

# Looking for a better damage report assistant

Team 'Looking for a better name'

# Jeff

is sad, because a storm  
damaged his house

# Jeff

Super mega happy  
GVB client

## How it works behind the scenes

- Neuronal network build by our own to classify the damage
  - Angular
- 
- Could reduce work by more than 75%. It handles all "simple" and recurring cases
  - 400k properties

## Future improvement

- Improve AI (get bigger dataset)
- Add image recognition (bill and damage scan)
- Insurance scam detection with AI
  - Link with external services like a weather service
- Partner can upload bill directly to the platform. The customer don't have to be the middle-man
- Ranking system of the GVB partners (electrician, plumber, exterminator...)
- Link reports together to see if they are true (for hail, ...)

# Tanks for your attention!

We don't need to look for a better public ;)
